

FOUNDATIONS NEURODEVELOPMENT

Pediatric Therapy Intensive Program

A focused, multidisciplinary therapy program designed to support foundational development during the early years.

- Multidisciplinary Sessions: **PT, OT, and Developmental Therapy** working together
- **Individualized plan** built around your child before the week begins
- Therapists who **specialize in early foundational development** (ages 0–5)
- **Photobiomodulation Laser Therapy** reduces brain inflammation so therapy sticks faster
- **Pediatric corrective chiropractic care** for alignment and nervous system support
- **Regulation-centered pacing** to keep your child engaged, not overwhelmed

ENROLL TODAY

If you've been considering more focused support, this is the time. Let's create a plan that supports lasting development.

Program Structure

- 1 60-Minute Planning Session**
 - 60-minute collaborative session
 - Therapy team aligns and builds your child's plan
